EXPERIENCE

OZELOT STUDIOS GMBH

2023 – ongoing

- Sole Web Developer & Web Designer
- Developed and shipped client websites and PWAs using Next.js, TypeScript and Prismic CMS for cultural institutions and creative clients

404HZ

2024–2026 (Part-Time)

- Drove product ideation and feature definition from concept to implementation
- Designed and built the full frontend from scratch using React and TypeScript
- Shaped the visual identity, UI system, and overall product aesthetic
- Contributed ~800 hours across design, development, and product strategy over two years

INTERNSHIP AT KILOKILO

2024 – 2024

- Successfully collaborated on two websites
- Responsibilities included programming and designing web pages

FREELANCE WORK

2022 – ongoing

- Delivered 20+ websites from concept to production for clients across cultural and scientific industries using technologies like React, Next.js, Three.js and React Three Fiber.
- Handled both development and design, working independently across the full project lifecycle

ABOUT ME

I'm a self-taught web developer based in Zürich with a passion for building clean, functional web experiences. I started coding in 2021 and haven't stopped since — I learn fast, take ownership of what I build. Outside of work I train Muay Thai and weightlifting, and like spending time with loved ones and my dog. Especially my dog.
